Set eyes way deeper
than I normally would

I'm consistently
placing the middle
off center

Center of eyelid will
always be deeper than
the center of brow bone.
offset should increase as
angle grows larger?

how far
back tho?

I'm
never sure
how far
back to
place
eyes in profile

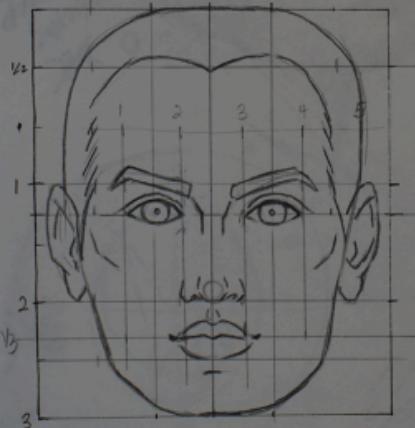

my spacing
intuition
is consistently
wrong

pupil centered

Loomis places
front of eye
halfway back

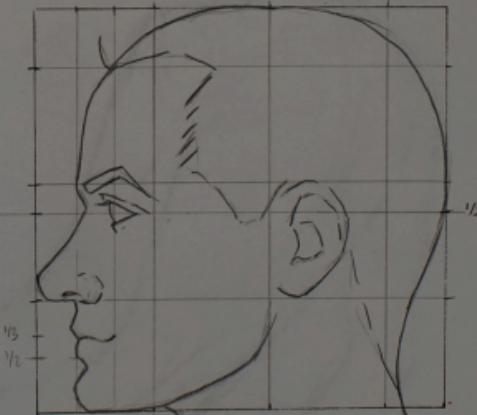

pupil centered

I'm not sure where
this line falls in
relation to the
cut off sides
